

Parallax Filter Custom Blades

Blue Lantern Modules

Dual/Stereo Filter

Model: BLM Parallax Filter

Width: 18hp

Current: +150mA -140mA

PCB LEVEL: 2 STACK, Power Connector on Level 1, Skiff Compatible.

This module is a custom jacks on top, knobs on the bottom design of the discontinued Mutable Instruments Blades dual multi-mode filter.

Original Design by Émilie Gillet

-Dual Distortion with spectral color control

-Fully analog, based on the 2164 quad VCA chip.

-Frequency knob range: 8Hz to 18kHz.

-Audio input impedance: 30k.

-DC-coupled audio inputs.

-Filter mode CV input impedance: 50k.

-Other CV inputs impedance: 100k.

-All CV inputs handle audio-rate modulations.

The project files for this product are located on the Survival page of the Blue Lantern modules website.
